SIA POWERTRAIN & POWER ELECTRONICS

Hybrid and Pure Electric Drivetrain Technologies
for Next Decade Low Carbon Mobility

On 9 and 10 June, IFPEN attended the SIA POWERTRAIN & POWER ELECTRONICS (Digital Edition 2021).

IFPEN Transports Energie Carnot Institute has presented, lectures and on a virtual booth, technological innovations, products and solutions that meet the future uses and needs of mobility, such as:

- hydrogen mobility
- electrified mobility including retrofit
- high-efficiency engines and very low-carbon fuels
- batteries.
