Connected Mobility

30 May - 01 June 2022

IFPEN Transports Energie Carnot Institute was present at the **Intelligent Transport Systems & Services (ITS) European Congress** from 30 May to 1<sup>st</sup> June 2022 in Toulouse.

IFPEN Transports Energie Carnot Institute has presented **technological innovations, products and software solutions** that meet the future uses and needs of mobility.

This gave the Carnot IFPEN Transports Energie the opportunity to present, on its stand, its innovations in the field of connected mobility, and in particular the **mobile application Geco air** which, by calculating the emissions of pollutants (NOx, CO, PM) and CO2 of its journeys, as well as the **national Mobility Data Hub project**, co-developed with Cerema and Inria, which aims to provide the various players with shared services for managing mobility data, analysing it and making predictions.

Discover Geco air that helps you to be more eco-responsible in your daily journeys. Start acting now !

Download Geco air,  
your 100% free mobility  
application
