|---|--------------------------------------|--------------------|
| Climate, environment and circular economy | CO2 capture, utilization and storage | Plastics recycling |
| Environmental monitoring                  | Life cycle analysis (LCA)            | Metal recycling    |

New R&I themes, stimulated by the energy transition and circular economy markets, are beginning to emerge. The multidisciplinary of IFPEN's researchers is used in projects covering fields as diverse as CO<sub>2</sub> capture/storage and plastics recycling, addressing the problems of industry.

- CO<sub>2</sub> capture, utilization and storage
- Plastics recycling
- Environmental monitoring
- Life cycle analysis (LCA)
- Metal recycling

Climate, environment and circular economy
