

IFPEN is keen to promote scientific research and ensure its knowledge is disseminated to the widest possible audience. Since 2012, its publications have been available in [open archives](#). IFPEN leads the editorial committee of [OGST \(Oil & Gas Science and Technology\)](#), an open access journal, and, several times a year, publishes a scientific information letter aimed at a broad public, [Science@ifpen](#).

With a view to disseminating its knowledge, **IFPEN's researchers present numerous papers and posters at conferences and publish articles listed in the Science Citation Index, as well as unlisted non-specialized and scientific articles** (articles in field-specific journals, in general).

550 IFPEN publications in 2021, including more than 200 referenced by the WoS

Over the period 2017-2021, IFPEN published papers with entities located in **some 60 different countries. More than 80% of them are co-published papers and about 40% are from international cooperations.** IFPEN primarily publishes with entities located in the USA, Germany and Canada.

Geographic breakdown of international joint publications (Web of Science) 2017 - 2021

IFPEN OPEN ARCHIVE

Since 2012, the [HAL-IFPEN](#) platform has provided open access to scientific papers published by IFPEN.

Most of these papers are available in full-text format, in their “post-print” version, unless otherwise indicated by the publishers. IFPEN’s aims are to:

- contribute to the development of open access to scientific and technical information,
- increase the dissemination of its research results.

More than **2,700** papers available in full-text format in HAL

STET (SCIENCE AND TECHNOLOGY FOR ENERGY TRANSITION)

STET is **an international scientific journal** headed by IFP Energies nouvelles (IFPEN) and the CEA (French Alternative Energies and Atomic Energy Commission), two major players in French energy research.

Its aim is to become a genuine forum for exchange and sharing of scientific findings related to an efficient and **sustainable energy transition** in response to climate change.

STET is an open access journal (*diamond open access*) with no publication costs for authors. The articles can also be viewed free of charge.

STET is the new name of the OGST (*Oil & Gas Science and Technology*) academic journal

The 2021 **impact factor** is 2.189

Some articles to submit? Feel free to contact the chief editors Benoit Noetinger (IFPEN) and Paul Lucchese (CEA), or access the [submission site](#).

THE SCIENCE@IFPEN NEWSLETTER

Four times a year, IFPEN publishes a scientific newsletter, Science@ifpen. The objective is to highlight recently published R&D results.
