Outstanding success for the MASCOT-NUM 2019 Annual

Conference, hosted by IFPEN (18-20 March 2019)

As a member of this research group from the outset, IFPEN hosted, from 18 to 20 March 2019 in Rueil Malmaison, the 14th annual [GDR Mascot-Num](#) conference, dedicated to **data assimilation, uncertainty quantification, statistical techniques for machine learning and numerical analysis**.

This latest conference, led by [Miguel Munoz Zuniga](#) from the Digital Science and Technology Division, focused in particular on statistical approaches to model inversion, design of experiments, sensitivity

analysis, as well as reliability and optimization.

With more than a hundred attendees from academia and industry, this conference provided an opportunity for researchers specializing in these various fields to present a review of their work and to exchange with their peers on the latest developments in this field.

Thanks to all participants, speakers, authors. You made the event a succes!
